Welcome to the ADAA Annual Conference

On behalf of the Annual Conference Committee, I am delighted to welcome you to the 33rd ADAA Annual Conference. I am thrilled to be the conference chair for an association that has been my professional home for nearly a decade. Here in La Jolla I trust that you will find the same intellectual stimulation, friendliness, and merging of great minds that I have always encountered at ADAA.

The theme of this year's conference, *Anxiety and Depression: Technology and New Media in Practice and Research*, embraces the new scope of the organization—both anxiety disorders and depression. As technology plays a greater role in our personal and professional lives, we must develop best practices for their use when treating patients, conducting and disseminating research, and providing education. In keeping with this need, we are pleased to have Dr. James Fowler, a pioneer of social networks research, deliver the keynote "Happiness, Depression, and the Power of Social Networking."

This meeting brings together a stellar program of top-notch researchers and clinicians whose work focuses on anxiety disorders and depression. To that end, we are happy to welcome Dr. Richard J. Davidson, who will present the Jerilyn Ross Lecture "Order and Disorder in the Emotional Brain."

In addition to a world-class scientific program, the ADAA conference provides a tremendous opportunity to meet colleagues, forge new friendships and professional relationships, and build your network face-to-face, as well as online. Stop by "Members' Corner" to learn how to build or update your online profile and access the ADAA members-only networking community. Follow ADAA on Twitter (#ADAA2013). Stay connected!

I look forward to meeting you at the conference.

Sincerely,

Luana Marques PhD.

CAREER DEVELOPMENT TRAVEL AWARDS

Since 1998 ADAA has supported the next generation of clinicians and researchers with this award. The travel awards are given to encourage early career professionals who have a research interest in anxiety disorders and depression. Award winners present their research at the annual conference, and they are paired with a mentor to learn about ADAA and its membership. Through unique partnerships, winners also have an opportunity to present their research at either the ACNP or ABCT annual meetings. Stop by to congratulate this year's winners at the Friday poster session.

DONALD F. KLEIN EARLY CAREER INVESTIGATOR AWARD

Named for Donald F. Klein, MD, a revolutionary in psychiatric thinking and recipient of the ADAA Lifetime Achievement Award, this award is given for the best original research paper on neurobiology, psychopharmacology, psychosocial treatments, or experimental psychopathology of anxiety and depression. The winner will present his research on Friday at 1:30 pm, and it will be published in *Depression and Anxiety*, the official ADAA journal.

ENGAGING WITH ADAA

Welcome to ADAA. Whether this is your first or your 33rd Annual Conference, I am confident that you'll find the time you spend here well worth it.

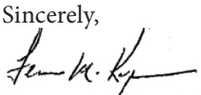
ADAA's strength is its complexity and multi-disciplinary approach to focusing on anxiety disorders and depression. At its core is ADAA's commitment to engage professionals from diverse disciplines spanning practice and research, and increase education about these disorders to help patients find treatment and end stigma. This is a tall order, but our members make this possible. ADAA members are passionate and committed to helping others, mentoring, and advancing science, treatment, and training.

Let me pass along the top five tips from members about how to get the most out of this conference.

1. **Network**. Meeting new people is the heart and soul of this meeting, which offers an invaluable opportunity to discuss challenging cases or move forward ideas on cases you are stuck on.
2. **Expand**. Go to talks that are outside your area of specialty. Attend a practice talk in an area that you are doing research in. Take away "pearls" that help in practice and research.
3. **Experience**. Get involved with committees and special interest groups to increase your network and learn from others to enhance your experiences.
4. **Stop at Members' Corner** to discover how to get more out of your membership—or why you should become an ADAA member.
5. **Stay connected**. ADAA's community provides continued enrichment and professional development throughout your career. Sign up for a Dine-Around and meet colleagues for dinner at nearby restaurants.

Stop anyone wearing an "Ask Me" button to learn more about ADAA or to give feedback on your experience at the conference. Enjoy your time here.

Sincerely,



Terence M. Keane, PhD
ADAA President

CHAMPIONS OF ADAA

Members are our best ambassadors. And those who make time to volunteer, reach out, and take on special initiatives are our champions. Members of the Board of Directors and committees, those who make time to review submissions and award applications—all champions. Their actions make ADAA better.

Here are a few ADAA champions you should get to know.

Amelia Aldao helped launch the Early Career and Student Special Interest Group in 2011. She volunteered to lead the way, and as co-chair she organized a reception for the SIG at last year's meeting with special entertainment provided by Joe LeDoux. Amelia joined in 2009 while earning her doctorate at Yale University. Now at The Ohio State University, she is an assistant professor of psychology and director of the Psychopathology and Affective Sciences Lab. Amelia's investment in ADAA has been invaluable, and she looks forward to involving more students and early career professionals in the organization.

Champions are a force for good, and that describes Jim Abelson. Four years ago he established a mentor program for our Career Development Travel Award winners, thereby enriching their experiences. Jim goes to great lengths to find the perfect mentor-mentee match. He recognizes the importance of mentoring and the role senior members play in introducing and investing in the next generation. Feedback from our mentors and award recipients has been overwhelmingly positive. Jim, a professor of psychiatry at the University of Michigan who has been a member since 1991, received the ADAA Member of Distinction Award last year.

All our members are ambassadors, but those who choose to serve on the Membership Committee are cheerleaders as well. Beth Salcedo, the committee chair, wants to tell everyone why they should join ADAA. She will call, write, or talk to anyone about joining and becoming involved. Beth joined in 2004, and she sees the organization as very important to her professional development and to that of her practice. She is the medical director at The Ross Center for Anxiety and Related Disorders in Washington, DC, which supports our fundraising efforts by donating items. Stop by "Members' Corner" to meet Beth and others on this committee.

Simon Rego took to heart the adage "put your best foot forward" when he ran the 2013 Walt Disney World Marathon in January. He used the event as an opportunity to fundraise for ADAA via Crowdrise and a social media campaign that he called "Attacking Anxiety and Defeating Depression," raising almost $4,000. (Crowdrise is a crowdsourcing website for charitable purposes.) Simon, a member of our Board of Directors, is the director of psychology and CBT training at Montefiore Medical Center, and he is an assistant professor of psychiatry and behavioral sciences at Albert Einstein College of Medicine. You can follow his tweets @psyd.

NEW: FUTURE LEADERS PROGRAM

ADAA is proud to announce a new initiative: ADAA Future Leaders is an intensive mentoring and professional development opportunity for early career clinicians, residents, junior faculty, trainees, and postdoctoral fellows. Awardees will experience interactive learning that fosters thinking about anxiety disorders, OCD, PTSD, and depression as part of a diverse multidisciplinary community.

Highly participatory, the program features outstanding leaders in research and practice. It challenges thinking about practice and research and encourages creative discourse among professionals from different disciplines. Stimulating discussions will shape new ideas and ways of thinking about the future.

Awardees will attend the program, which begins one day prior to the 2014 annual conference in Chicago and continues throughout the meeting. It will include a full day of small group-mentoring sessions and assignment of a senior leader in the field to each awardee.

Session topics will cover funding from NIH, PCORI, and private foundations; ethical, safety, legal, and business considerations in clinical practice; developing careers that involve both practice and research; critique of research-project ideas; navigating the academic and clinical workplace, and more. Groups for each of the three tracks—Basic Neuroscience, Clinical Investigation, and Clinical Practice—will be limited in size.

Awardees will engage with mentors and peers throughout the year, and some may present at the ADAA 2015 annual meeting in Miami.

Eligibility

Awardees must be junior faculty, early career clinician, trainee, resident, or postdoctoral fellow in psychology, psychiatry, neuroscience, or related field.

Requirements

Selection will be competitive, based on a CV, two letters of recommendation, and the application that will include statements of what the applicant hopes to gain by participating.

Deadline: October 30, 2013

Welcome Reception

Join us to meet new colleagues and greet old friends. Open to registered participants; your badge is your admission ticket.

NEW THIS YEAR:
At the conference, make a donation to ADAA to support our efforts to advocate for the prevention, treatment, and cure of anxiety, depression, and related disorders, and to provide free educational information to patients and their families.

You could go home with an iPad mini or Kindle Fire HD (donated by Dr. Beth Salcedo, The Ross Center for Anxiety & Related Disorders).

Details at the Registration desk.

Jerilyn Ross Lecture: Order and Disorder in the Emotional Brain
Richard J. Davidson, PhD, University of Wisconsin-Madison

This special lecture honors the memory of Jerilyn Ross, one of ADAA's founders and a pioneer in the mental health field. Jerilyn served as president and CEO for 25 years until her death in 2010. She was an ardent public advocate and clinician. Jerilyn had her first panic attack in her twenties, and she talked openly about feeling frightened and alone. After finding treatment, Jerilyn's commitment to helping others spurred the founding of ADAA. Her vision was to bring together clinicians, researchers, and patients in support of advancing science, treatment, and education. Your participating here today is her legacy.

Magellan is a Proud Supporter of the ADAA Conference

Magellan Behavioral Health believes in the ADAA's mission to lead in education, training, and research for anxiety, depression, and stress-related disorders. Helping individuals gain access to the right services at the right time is critical in addressing the life challenges and social barriers that coping with these disorders can pose.

Magellan offers quality-driven, behavioral health programs and services centered on a "whole person" clinical approach. With a robust network of more than 74,000 providers nationwide, we are honored to serve approximately 33.8 million members.

By working closely with individuals, their families and providers to understand the complexities of anxiety, depression, and stress-related disorders, Magellan is able to develop innovative solutions that empower individuals to lead happier, healthier lives.

If you would like to learn more about Magellan, please visit our corporate website at www.MagellanHealth.com, or our behavioral health provider site at www.MagellanHealth.com/provider.

Evidence-based treatment.
Life-changing results.

Under the leadership of Bradley C. Riemann, PhD, Rogers Memorial Hospital has become a premiere treatment provider for children, teens and adults with OCD and anxiety disorders.

We are excited to announce the opening of a new 16-bed residential program for adults with anxiety disorders and depression in 2013.

Could you really experience relief from OCD and anxiety symptoms in as little as one treatment session? And could you be finished with anxiety treatment in as little as six months with lasting results? When treating children, our philosophy is to involve the family or primary caretakers. In our experience, treating only the child, without attending to family members, resembles treating within a vacuum.

GENERAL INFORMATION

The ADAA Annual Conference provides continuing education for clinicians and researchers. This conference offers a forum to share treatment information and research data, as well as individual cases.

The educational format ranges from research lectures to clinical workshops. Individuals with anxiety disorders and depression and their families are invited to participate in this professional conference to learn about the most recent research into the causes, diagnoses, and treatment of anxiety disorders and depression. All presentations and posters are peer-reviewed.

Badges | Required for admission to all sessions, meals, and receptions. Please wear your badge during the conference and remember to remove it whenever you leave the hotel. If you lose your badge, come to Registration for a replacement; **you will be charged $5 for a new badge**.

Breakfast | Light breakfast, coffee, and tea is available to all registered attendees Friday through Sunday in the Barcino Exhibit Area and Grand Foyer (Lower Level).

Lunch | On Friday and Saturday, lunch is on your own; pick up information about restaurants at Registration. The hotel will offer discounts on grab-and-go lunches.

Executive business pods | Located on the Lower Level and Second Floor off the guest elevators, four business pods offer complimentary Internet, computers, and printers for guest use. Copying services are available at the front desk or at FedEx Office, 8849 Villa La Jolla Dr., a 10-minute walk from the hotel (phone 858-457-3775; open 24 hours).

Emergency information | In the event of an emergency inside the hotel, please dial "0" to request assistance. Outside the hotel, dial 911.

Internet access | All ADAA hotel guests at the Hyatt Regency La Jolla at Aventine will receive free wired Internet access in their rooms.

Message board | Located near Registration; you may leave a message on the board to contact conference participants. Incoming messages will also be posted.

Photographing/Videotaping | Attendees may not videotape, audiotape, or photograph presentations without prior permission from the chair and speakers.

Poster set-up | All poster sessions will be held in Aventine Ballroom DEFG (Lower Level.) ***All presenters***: You must be registered and show your badge to hang your poster, and you must remain near your poster during your session. Remove your poster at the end of your session, or the hotel will dispose of it.

Smoking | **Never permitted** during any session, meeting, or function.

CONTINUING EDUCATION

OVERVIEW

The conference aims to leverage its broad audience to synthesize cutting-edge knowledge, accelerate dissemination, and translate scientific evidence to practice by engaging clinicians.

The ADAA Annual Conference is novel and actively works to advance knowledge in unique ways: 1) fostering dissemination and collaboration among basic and behavioral researchers; 2) encouraging researchers and clinicians to discuss practical applications in real-life settings; 3) accelerating translation of research to practice with hands-on training of empirically tested treatments; 4) involving early career investigators, students, and trainees in research and learning; and 5) providing opportunities for professionals to hear patient perspectives. The conference engages all of these audiences, building bridges and supporting these networks throughout the year.

STATEMENT OF NEED

Approximately 40 million American adults ages 18 and older, or about 18.1 percent of people in this age group in a given year, have an anxiety disorder, which often presents with comorbidities and psychosomatic symptoms. Only about one-third of these patients receive treatment. Further, implementation of evidence-based practices is critical to improving outcomes for patients with anxiety and related disorders.

At the conclusion of this activity, attendees should be better able to …

- Identify comorbid mental and physical disorders that may impact patient anxiety.
- Discuss the latest research in the diagnosis and treatment of anxiety disorders with colleagues.
- Critically evaluate the controversies in patient diagnosis and treatment.
- Compare and contrast evidence-based pharmaceutical and psychosocial options.
- Evaluate the novel therapies emerging as treatments for anxiety disorders.
- Discuss translational research with colleagues and how it informs clinical decisions
- Analyze the symptoms and the differences in evidence-based diagnosis and treatment available to patients at various stages of life.
- Differentiate diagnoses of anxiety disorders with respect to gender differences, age, and comorbidity.
- Evaluate the research on the links between medication and alternative therapy.
- Recognize warning signs of adverse reactions.

Predicted Outcomes

- Design strategies to incorporate awareness of comorbidity into the treatment of anxiety disorders.
- Analyze and select the best treatment option based on research and those available for patients suffering with more than one mental illness.
- Incorporate current evidence-based data and appropriate guidelines to the diagnosis and treatment of anxiety disorders.
- Establish practice protocols to determine whether a novel or traditional therapy would be most appropriate for a patient.
- Consider a patient's stage in life as part of the diagnostic protocol.
- Consider possible adverse drug interactions with herbal and alternative therapies when counseling patients.
- Better recognize the warning signs of the occurrence of an adverse reaction.

CONTINUING EDUCATION CREDITS

CE and CME credits are available to registered professional physicians, psychologists, social workers, nurses, and counselors. **Members do not pay an additional fee**; nonmembers can receive credits for an additional fee of $55 per discipline. Only professional attendees can receive CE and CME credits; those paying guest, student, or consumer fees cannot apply for CE and CME credits. Attendance verification forms and online evaluations must be completed by May 15, 2013, to be eligible for credit.

CE CREDITS

CE Credits are available for professionals through these organizations:

Psychologists | ADAA is approved by the American Psychological Association to sponsor continuing education credits for psychologists. ADAA maintains responsibility for this program and its content. CE credits for psychologists are granted on a 1 credit per contact hour.

Social Workers | This program is approved by the National Association of Social Workers (provider #886437837) for social work continuing education contact hours.

Counselors | This program is approved by the National Board for Certified Counselors (Approval Number: SP-2150) for continuing education credits.

Physicians assistants and nurse practitioners | *AMA PRA Category 1 Credit™* can only be awarded to MDs or DOs (or physicians with equivalent degrees from other countries). Non-physicians may not be awarded *AMA PRA Category 1 Credit™*. Non-physicians may, however, receive a certificate of attendance/participation that acknowledges the activity was designated for *AMA PRA Category 1 Credit™* in order to apply their participation toward re-licensure.

This course meets the qualifications for continuing education for MFTs and LCSWs, as required by the California Board of Behavioral Sciences. (Approval #1289)

HOW TO APPLY FOR CE CREDITS

1. Pick up a continuing education attendance verification form during posted registration hours. To receive credits, you must complete the form and mark each session you attend. This will determine how many credits you are eligible to receive.
2. Return the completed form to Registration by Sunday, 1:00 pm. You will receive a signed copy as your receipt. *IMPORTANT: If you forget to hand in the form, mail the attendance verification form AFTER the conference to ADAA by May 15, 2013, or no credit will be given. No exceptions.*
3. All CE applicants will receive a conference evaluation form via e-mail. You must complete the online evaluation by **May 15** to receive CE credits. No exceptions.

CME CREDITS

Accreditation | This activity has been planned and implemented in accordance with the Essential Areas and Policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint sponsorship of Blackwell Futura Media Service and Anxiety and Depression Association of America (ADAA). Blackwell Futura Media Service is accredited by the ACCME to provide continuing medical education for physicians.

Designation | Blackwell Futura Media Service designates this live educational activity for a maximum of 28.25 *AMA PRA Category 1 Credits™*. Physicians should only claim credit commensurate with the extent of their participation in the activity. Blackwell Futura Media Service and ADAA present this activity for educational purposes only and do not endorse any product, content of presentation, or exhibit. Participants are expected to utilize their own expertise and judgment while engaged in the practice of medicine. The content of the presentations is provided solely by presenters who have been selected because of their recognized expertise.

Faculty Disclosure | It is the policy of Blackwell Futura Media Service to plan and implement all of its educational activities in accordance with the ACCME's Essential Areas and Policies to ensure balance, independence, objectivity, and scientific rigor. In accordance with the ACCME's Standards for Commercial Support, everyone who is in a position to control the content of an educational activity certified for *AMA PRA Category 1 Credit™* is required to disclose all financial relationships with any commercial interests within the past 12 months that creates a real or apparent conflict of interest. Individuals who do not disclose are disqualified from participating in a CME activity. Individuals with potential for influence or control of CME content include planners and planning committee members, authors, teachers, educational activity directors, educational partners, and others who participate, e.g., facilitators and moderators. This disclosure pertains to relationships with pharmaceutical companies, biomedical device manufacturers, or other corporations whose products or services are related to the subject matter of the presentation topic. Any real or apparent conflicts of interest related to the content of the presentations must be resolved prior to the educational activity. Disclosure of off-label, experimental, or investigational use of drugs or devices must also be made known to the audience.

HOW TO APPLY FOR CME CREDITS

Pick up a continuing education tracking form during posted registration hours. Complete the form and mark each session you attend for your own record.

NOTE the online process for CME applicants:

1. You will receive an e-mail prior to your arrival at the conference with a customized login for all session evaluations.
2. You will briefly evaluate the sessions you attended.
3. Complete an overall conference evaluation.
4. Download your official CME certificate immediately.

ANXIETY DISORDERS AND DEPRESSION CONFERENCE 2014

Personalized Treatments for Anxiety and Mood Disorders
March 27–30, 2014
Chicago Marriott Downtown
Chicago, Illinois

PROGRAM OVERVIEW

Capitalizing on emerging science on mediators, biomarkers, and moderators of response to intervention, the theme of this conference is personalized interventions for anxiety disorders, OCD, PTSD, and depression. There are now well over 400 empirically supported treatments and drugs for anxiety and depression. Thus the challenges of personalized medicine involve determining what interventions work for whom, when, and under what circumstances and how to share decision-making with patients.

The purpose of the conference is to foster dissemination of new research and real-world experiences to accelerate improvements in outcomes. Submissions are not limited to the theme and they should cover topics across the lifespan.

- Science and practice of personalized medicine and treatment matching strategies in the treatment of anxiety and mood disorders.
- Acquisition of skills related to CBT, ACT, DBT, IPT, EMDR, exposure, functional analysis, and other psychotherapies.
- Research and practice related to pharmacotherapy for children and adults, including novel treatments and interaction of medications and herbal remedies.
- Sessions that bring together those in practice and research to discuss and debate topics that result in innovations and improvement of outcomes for patients, especially those with refractory disorders.
- Practice and research related to the relative effectiveness of manualized treatment versus targeted application of empirically supported treatment strategies.
- Translation of personalized evidence-based treatment to new contexts and settings, countries, and cultures designed to decrease health disparities and minimize the research-practice gap.
- Case presentations on anxiety disorders, OCD, PTSD, depression, and comorbid illnesses in children and adults.
- Methodological advances fostering the identification of biomarkers of response, such as mixed-methods approaches, qualitative data approaches, and web-based trainings.
- Basic research on developmental psychopathology, genetics, neuroimaging, and animal models as it pertains to anxiety, depression, and fear.
- Comparative-effectiveness research highlighting the application of the findings to improve treatment in standard, primary care, and novel settings and with special populations.
- Science and practice involving the use of technology, telemedicine, and social media in the treatment and/or adjunct to treatment.
- Research encouraging relevant and timely discussions about access, delivery of services, health literacy, payment, mental health parity, and legislation.
- Dissemination and implementation of evidence-based treatments applied in everyday practice for treating complicated and treatment-resistant cases of anxiety disorders, OCD, PTSD, depression, anxiety and comorbid mental illnesses, and anxiety and psychosomatic illnesses such as asthma, diabetes, eating disorders, epilepsy, fibromyalgia, heart disease, substance abuse, IBS, and suicide risk.
- *DSM-5* and its implementation in practice.

SUBMISSION INFORMATION

The online submission site will open in June 2013. Visit www.ADAA.org for complete information, including what you need to know before submitting an abstract.

New for 2014! ADAA will accept "Late-Breaking Poster Abstracts" to encourage the presentation of new, cutting-edge high-impact research. These abstracts describe current research advances, presenting state-of-the-art studies that have not been submitted previously. A limited number (up to 10), will be accepted based on scientific quality and novelty of research. Submissions will be due approximately 8 to 10 weeks before the conference. This category is not a second chance for those who missed the poster abstract deadline.

SOCIAL ANXIETY AFFECTS 15 MILLION AMERICANS. HOW CAN YOU HELP?

AKFSA is proud supporter and attendee of The 2013 Anxiety Disorders and Depression Conference.

WHAT IS AKFSA?

The Andrew Kukes Foundation for Social Anxiety (AKFSA) is on a mission to educate social anxiety sufferers, mental health professionals, physicians, teachers, coaches, clergy, friends, family and the general public about the diagnosis and treatment of social anxiety. We believe education is the key to helping social anxiety sufferers and empowering those who can make a difference in their lives.

HELP US CHANGE LIVES

Please consider lending your knowledge and expertise to our cause. Whether you are currently practicing and treating patients or engaged in research and academia, you can help us make a difference. AKFSA offers many opportunities for mental health professionals to get involved.

To learn more about AKFSA and how you can get involved, contact Executive Director Lori Blumenstein-Bott at 248.539.3011 or lori@akfsa.org, or you can visit akfsa.org.
